

ARGYROSAURUS SUPERBUS

Clade	Titanosauria
Localitat i província	Río Chico, Chubut
Formació	Bajo Barreal
Edat	Cretaci superior
Material	Húmer, cúbit, radi, probablement dos carps (perduts) i cinc metacarps.
Entorn	Fluvial
Autors	Lydekker (1893)
Notes	El nom significa 'rèptil de plata orgullós', del grec <i>argyros</i> ('plata') i <i>saurus</i> ('rèptil') i del llatí <i>superbus</i> ('orgullós').

A black silhouette of the dinosaur Argysaurus superbus is shown in profile, facing left. It has a very long, thick neck that curves upwards. The body is relatively compact, with a long tail. To the right of the dinosaur's hind legs, two small human silhouettes are standing side-by-side, providing a sense of scale to the dinosaur's massive size.

Taula 1. *Argyrosaurus superbus*, informació general.
